Employment: Full-time

PROFILE

Graduate of the Belarusian State University of Informatics and Radioelectronics (BSUIR) with a degree in System Software Engineering. During my studies, I learned computer systems architecture, mathematics, web development, and different software development technologies. I have good practical skills working with .NET, C#, ASP.NET Core, Entity Framework Core, SQL, and Docker.

Throughout my education, I participated in team projects where I improved my communication, teamwork, and problem-solving skills. I also worked on pet-projects, completed university practice using .NET technologies, and participated in freelance projects as an ASP.NET developer.

Interested in professional growth in the field of .NET development, learning modern technologies, and gaining practical experience in a team of experienced developers. Highly motivated to learn new technologies as a software developer and continuously improve my soft skills.

PROJECTS

ONLINE LIBRARY PLATFORM

2024

Freelance ASP.NET developer

- Developed backend functionality and business logic for an online library platform for students.
- Worked with ASP.NET Core, Entity Framework Core, and MS SQL Server.
- Implemented database interaction and API functionality, used Docker for containerization and project deployment.

Technologies: ASP.NET Core, EF Core, MS SQL Server, Docker.

DELIVERY MANAGEMENT SYSTEM

2024

.NET developer (university practice)

- Participated in the development of a delivery management system during university practice.
- Worked on delivery route generation using Mapbox API integration.
- Implemented order and product tracking features for different delivery regions.

Technologies: ASP.NET Core, PostgreSQL, Mapbox API, JavaScript.

TASK MANAGER

Present

Personal Pet-Project

- Developing an advanced task management web application using ASP.NET Core Web API.
- Working on collaborative tasks, team workspace features, and data analytics
- Writing unit tests with xUnit and configuring Docker containers.
- Using GitHub Actions for CI/CD and project automation.

Technologies: ASP.NET Core Web API, PostgreSQL, EF Core, JWT, JavaScript, xUnit, Docker, Github Actions.

EDUCATION

Belarusian State University of Informatics and Radioelectronics (BSUIR), Bachelor

2020-2024

Faculty of Computer Systems and Networks

- Degree Qualification: System Software Engineer
- GPA: 8.1/10
